

DECLINING WEIGHT EQUIPMENT

WOLF TRAX® DDP® micronutrients allow for greater equipment flexibility. When using a declining weight blender, retailers can achieve optimal blending to maximize efficiency. To incorporate WOLF TRAX into your declining weight system, utilize a powder feeder as an addition to your equipment, designed to provide an efficient handling option.

POWDER FEEDER BENEFITS:

FLEXIBLE HANDLING OPTIONS

Includes various configurations allowing for automation to ensure operational efficiency. In many cases, the powder feeder will discharge directly into the blender screw for simple integration.

EASY TO USE

The Powder Feeder can be utilized with WOLF TRAX drums or boxes with a focus on dosing and conveying for accuracy.

SIMPLIFY NUTRIENT MANAGEMENT WITH WOLF TRAX

Give your crops a balanced nutrition plan throughout the growth cycle. WOLF TRAX DDP micronutrients are formulated to prevent soil or weather-induced micronutrient deficiencies that can limit crop performance and yield potential. The patented technology in every WOLF TRAX formulation can simplify nutrient management, improve handling and enhance potential return on investment.

Set crops up for success with a balanced nutrition plan.
